D. Choosing the Spatial Reference System	8
srs (optional).....	8
E. Setting default background map visibility	8
useDefaultbackgroundMapping (optional)	8
Appendix 1 – layer names	9

1. Overview

The Magic Map Application can be called by 3rd party application via a URL and URL parameters.

The various URL parameters allow the map to open at a particular location & with specific layers selected & certain features highlighted.

The document describes those URL parameters.

The format of the URL parameters have been kept in line with previous versions of magic where possible

Example call

`http://magic.defra.gov.uk/MagicMap.aspx?parameters`

Example:

`http://magic.defra.gov.uk/MagicMap.aspx?startTopic=Access&chosenLayers=ntrailsIndex,natcycleIndex&box=100000:1000000:200000:200000`

2. Magic URL parameters

A. Choosing the Layers to show

startTopic(optional)

Start Topic Equates to a “Root Level” Map Service in the Magic Table of Content

A short code is used to minimise the effects of re-naming or re-ordering map topics.

It only sets the map service visible and does not select any datasets

Example: `&startTopic=Access`

Topics

TopicID	MapServiceFullName
Access	Access
AdministrativeGeographies	Administrative Geographies
Designations	Designations
HabitatsAndSpecies	Habitats and Species
LandBasedSchemes	Land Based Schemes
Landscape	Landscape
Marine	Marine
BackgroundMapping	Background Mapping
Magic_Watermark	Watermark
Rasters	Rasters
GreyRasters	Grey Rasters
AerialPhotography	Aerial Photography

chosenLayers

chosenLayers is a comma separated list of layers from single or multiple topics. See Appendix 1 for a valid layer list, and they are case sensitive.

Example: `&chosenLayers=monclIndex,wgs1Index,npklIndex,aonbIndex`

B. Choosing the Region to zoom to

The region to zoom to can be set as a bounding box or a map centre and scale.

If a bounding box parameter is passed, additional map centre & scale parameters are ignored

The map will always open in OSGB36 projection unless specified in srs

box (bounding box)

box represents a bounding box to zoom into. It is expected that these coordinates should be appropriate for spatial reference system specified

left:bottom:right:top colon separated

example: `&box=345000:280000:355000:295500` for OSGB36

`&box=-0.1511:50.7895:1.0335:51.608` for WGS84

sqgridref (map center)

The map centre as a valid 6 digit grid reference.

This parameter is ignored if *box* is specified

Example: `sqgridref= SX576123`

xygridref

The map centre as a valid easting, northing pair 12 digit grid reference

This parameter is ignored if *box* or *sqgridref* are specified

Example: `xygridref= 234567,567321`

startScale

The scale to open the map at
This parameter is ignored if *box* is specified

Example: startScale= 10000

C. Zooming to a particular Feature

The 3rd party application can zoom to a particular feature within a particular layer. By specifying the following 2 parameters together:

activelayer

This is the layer to search within

Example: &activelayer=postcodes

query

This is a valid SQL Query. Note that the calling application needs to know the correct column names within the activelayer

Valid Queries are:

- LIKE QUERIES
- = QUERIES

Note that the quotation marks, spaces & equal signs must be replaced with appropriate URL ANSI codes

Character Escape Code

SPACE	%20
“	%22
‘	%27
*	%2A
%	%25
=	%3D

Note that all the layers under the *Postcodes* topic cannot be made “visible” on the map, but they can be used to perform a “zoom to”

Zoom to Feature Examples

Postcode='LS16 5QQ'
&activelayer=postcodes&query=POSTCODE%3d%27LS16%205QQ%27

County like 'Kent%'
&activelayer=cuagbIndex&query=NAME%20LIKE%20%27Kent%25%27

If you wish to connect in this way, please contact the MAGIC team for assistance data.services@naturalengland.org.uk

D. Choosing the Spatial Reference System

The spatial reference system can be set using srs.

srs (optional)

If it is not specified the default is set to British national coordinate system (OSGB36)

The valid srs options available are OSGB36, WGS84 and ETRS89

Example: srs= WGS84

E. Setting default background map visibility

The default background map visibility can be set with this parameter.

useDefaultbackgroundMapping (optional)

If it is not specified the default is set to true.

Interactive Map bookmark will now look like this (with a new parameter)

B&W

<http://magic.defra.gov.uk/MagicMap.aspx?chosenLayers=ntrailsIndex,backdropDIndex,backdropIndex,europaIndex,vmlBWIndex,25kBWIndex,50kBWIndex,250kBWIndex,miniscaleBWIndex&box=-1130470:0:1930470:1400000&useDefaultbackgroundMapping=false>

Colour:

<http://magic.defra.gov.uk/MagicMap.aspx?chosenLayers=ntrailsIndex,backdropDIndex,backdropIndex,europaIndex,vmlIndex,25kIndex,50kIndex,250kIndex,miniscaleIndex&box=-400972:-21556:1129498:678444&useDefaultbackgroundMapping=false>
