## 1. Overview

The Magic Map Application can be called by 3<sup>rd</sup> party application via a URL and URL parameters.

The various URL parameters allow the map to open at a particular location & with specific layers selected & certain features highlighted.

The document describes those URL parameters.

The format of the URL parameters have been kept in line with previous versions of magic where possible

### Example call

`http://magic.defra.gov.uk/MagicMap.aspx?parameters`

Example:

`http://magic.defra.gov.uk/MagicMap.aspx?startTopic=Access&chosenLayers=ntrailsIndex,natcycleIndex&box=100000:1000000:200000:200000`

## 2. Magic URL parameters

### A. Choosing the Layers to show

#### **startTopic(optional)**

Start Topic Equates to a “Root Level” Map Service in the Magic Table of Content

A short code is used to minimise the effects of re-naming or re-ordering map topics.

It only sets the map service visible and does not select any datasets

Example: `&startTopic=Access`

## Topics

TopicID	MapServiceFullName
Access	Access
AdministrativeGeographies	Administrative Geographies
Designations	Designations
HabitatsAndSpecies	Habitats and Species
LandBasedSchemes	Land Based Schemes
Landscape	Landscape
Marine	Marine
BackgroundMapping	Background Mapping
Magic_Watermark	Watermark
Rasters	Rasters
GreyRasters	Grey Rasters
AerialPhotography	Aerial Photography

### chosenLayers

chosenLayers is a comma separated list of layers from single or multiple topics. See Appendix 1 for a valid layer list, and they are case sensitive.

Example: `&chosenLayers=monclIndex,wgs1Index,npklIndex,aonbIndex`

## B. Choosing the Region to zoom to

The region to zoom to can be set as a bounding box or a map centre and scale.

If a bounding box parameter is passed, additional map centre & scale parameters are ignored

The map will always open in OSGB36 projection unless specified in srs

### **box (bounding box)**

box represents a bounding box to zoom into. It is expected that these coordinates should be appropriate for spatial reference system specified

*left:bottom:right:top* colon separated

example: `&box=345000:280000:355000:295500` for OSGB36

`&box=-0.1511:50.7895:1.0335:51.608` for WGS84

### **sqgridref (map center)**

The map centre as a valid 6 digit grid reference.

This parameter is ignored if *box* is specified

Example: `sqgridref= SX576123`

### **xygridref**

The map centre as a valid easting, northing pair 12 digit grid reference

This parameter is ignored if *box* or *sqgridref* are specified

Example: `xygridref= 234567,567321`

### **startScale**

The scale to open the map at  
This parameter is ignored if *box* is specified

Example: startScale= 10000

## **C. Zooming to a particular Feature**

The 3<sup>rd</sup> party application can zoom to a particular feature within a particular layer. By specifying the following 2 parameters together:

### **activelayer**

This is the layer to search within

Example: &activelayer=postcodes

### **query**

This is a valid SQL Query. Note that the calling application needs to know the correct column names within the activelayer

Valid Queries are:

- LIKE QUERIES
- = QUERIES

Note that the quotation marks, spaces & equal signs must be replaced with appropriate URL ANSI codes

**Character Escape Code**

SPACE	%20
“	%22
‘	%27
*	%2A
%	%25
=	%3D

Note that all the layers under the *Postcodes* topic cannot be made “visible” on the map, but they can be used to perform a “zoom to”

**Zoom to Feature Examples**

Postcode='LS16 5QQ'  
&activelayer=postcodes&query=POSTCODE%3d%27LS16%205QQ%27

County like 'Kent%'  
&activelayer=cuagbIndex&query=NAME%20LIKE%20%27Kent%25%27

If you wish to connect in this way, please contact the MAGIC team for assistance [support.magic@defra.gsi.gov.uk](mailto:support.magic@defra.gsi.gov.uk)

## D. Choosing the Spatial Reference System

The spatial reference system can be set using srs.

### srs (optional)

If it is not specified the default is set to British national coordinate system (OSGB36)

The valid srs options available are OSGB36, WGS84 and ETRS89

Example: srs= WGS84

## E. Setting default background map visibility

The default background map visibility can be set with this parameter.

### useDefaultbackgroundMapping (optional)

If it is not specified the default is set to true.

**Interactive Map bookmark** will now look like this (with a new parameter)

B&W

<http://magic.defra.gov.uk/MagicMap.aspx?chosenLayers=ntrailsIndex,backdropDIndex,backdropIndex,europaIndex,vmlBWIndex,25kBWIndex,50kBWIndex,250kBWIndex,miniscaleBWIndex&box=-1130470:0:1930470:1400000&useDefaultbackgroundMapping=false>

Colour:

<http://magic.defra.gov.uk/MagicMap.aspx?chosenLayers=ntrailsIndex,backdropDIndex,backdropIndex,europaIndex,vmlIndex,25kIndex,50kIndex,250kIndex,miniscaleIndex&box=-400972:-21556:1129498:678444&useDefaultbackgroundMapping=false>
